$2 \ln \mathcal{B}_{\alpha\beta}(d)$	Evidence for model \mathcal{M}_{α} relative to \mathcal{M}_{β}
<0	Negative (supports model \mathcal{M}_{β})
0–2	Not worth more than a bare mention
2–6	Positive
6–10	Strong
	<0 0-2 2-6

Very strong

Adapted from Kass and Raftery (1995)
